## DETAILED ACTION

### *Election/Restrictions*

1. Claims **1 – 21** are presented for examination
2. This application contains claims directed to the following patentably distinct species of the claimed invention:

**a) Species I, e.g. claims 1 – 12: embodiments 1 – 3, figures 4 – 8,** which claim an organic electroluminescent with connecting line passing through a channel from the top of an isolating seal cap.

**b) Species II, e.g. claims 13 – 17: embodiment 4, figure 9.** which claim an organic electroluminescent with connecting line passing through a channel chiseled through a substrate.

**c) Species III, e.g. claims 18 – 21: embodiment 4, figure 10.** which claim an organic electroluminescent with a surface-mounted line through one side of an isolating seal cap.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, no claim is generic. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is all claims are generic is considered non-responsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patent-able distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions un-patent-able over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor-ship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor-ship must be accompanied by a diligently-filled petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
